

**Department of Children, Youth and Families**  
**Family and Children's Trust Fund**  
Community-Based Child Abuse Prevention

Request for Proposals – 2010  
**Addendum**

---

A summary of the pre-proposal meeting held on March 19, 2010 is posted.

---

Department of Children, Youth and Families  
Family and Children's Trust Fund – Community-Based Child Abuse Prevention

Pre-proposal Meeting March 19, 2010

- Attendees at the pre-proposal meeting were given a powerpoint handout – Logic Models and Evaluation. A copy of that handout is included in this addendum.
- **Clarification on proposed interventions:** Respondents to the RFP must provide an evidence-based or evidence-informed child maltreatment prevention-focused service model to address the identified need for the population that is being targeted in their proposal. The proposal must include a logic model that links services and activities to the desired outcome.
- **Clarification on data collection:** Respondents must have the capability to enter data into an excel spreadsheet and the capacity to collect all required data elements relating to services provided and outcome measurement. The Family and Children's Trust Fund will provide resources to assist successful applicants in the implementation and monitoring of their program evaluation.
- **Clarification on target populations:** The RFP is designed primarily to promote secondary prevention activities focused on the development or expansion of community-based services to prevent child maltreatment. Respondents should develop proposals that are designed to address needs that may avert a child from coming into the care of DCYF.
- **Clarification on indirect costs:** Providers should use their federally approved rate or 14%, whichever is lower in determining their indirect cost in submitting the proposal.

# ***Logic Models and Evaluation***

**Rhode Island College**  
**School of Social Work**

## Quote of the day

- If you don't know where you're going, how are you gonna know when you get there?

- Yogi Berra

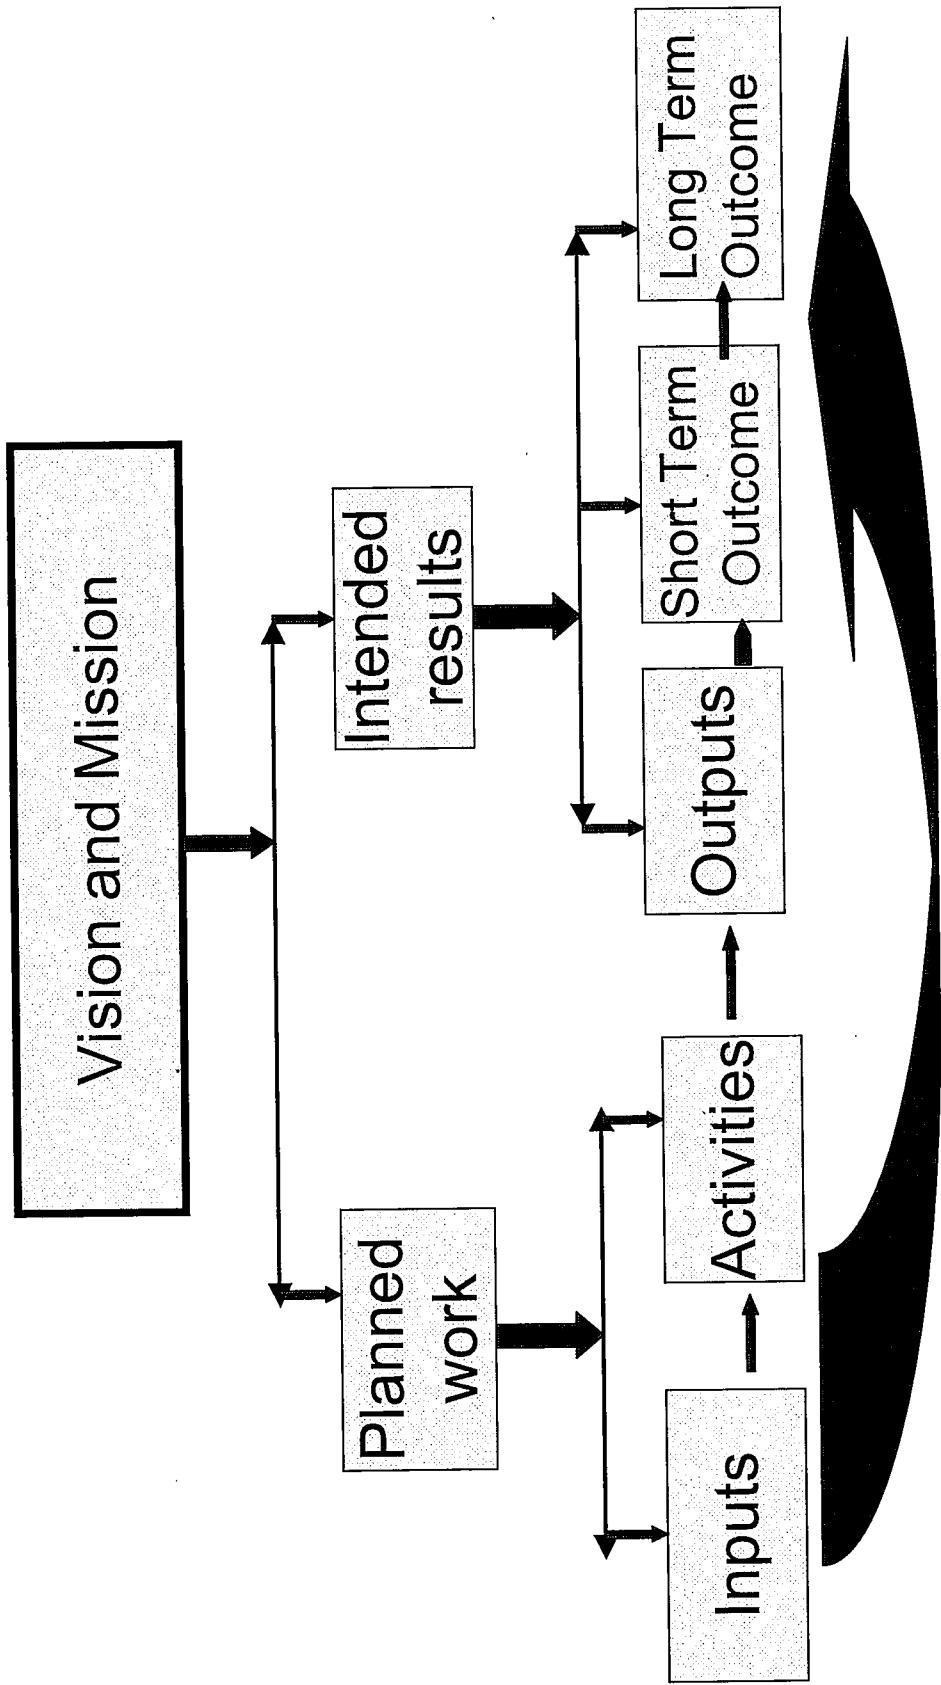

# Logic Model

- What is a logic model?
- What are the steps in creating a logic model?
- How do I make a logic model?
- What are the benefits of developing and using a logic model?

# What is a logic model?

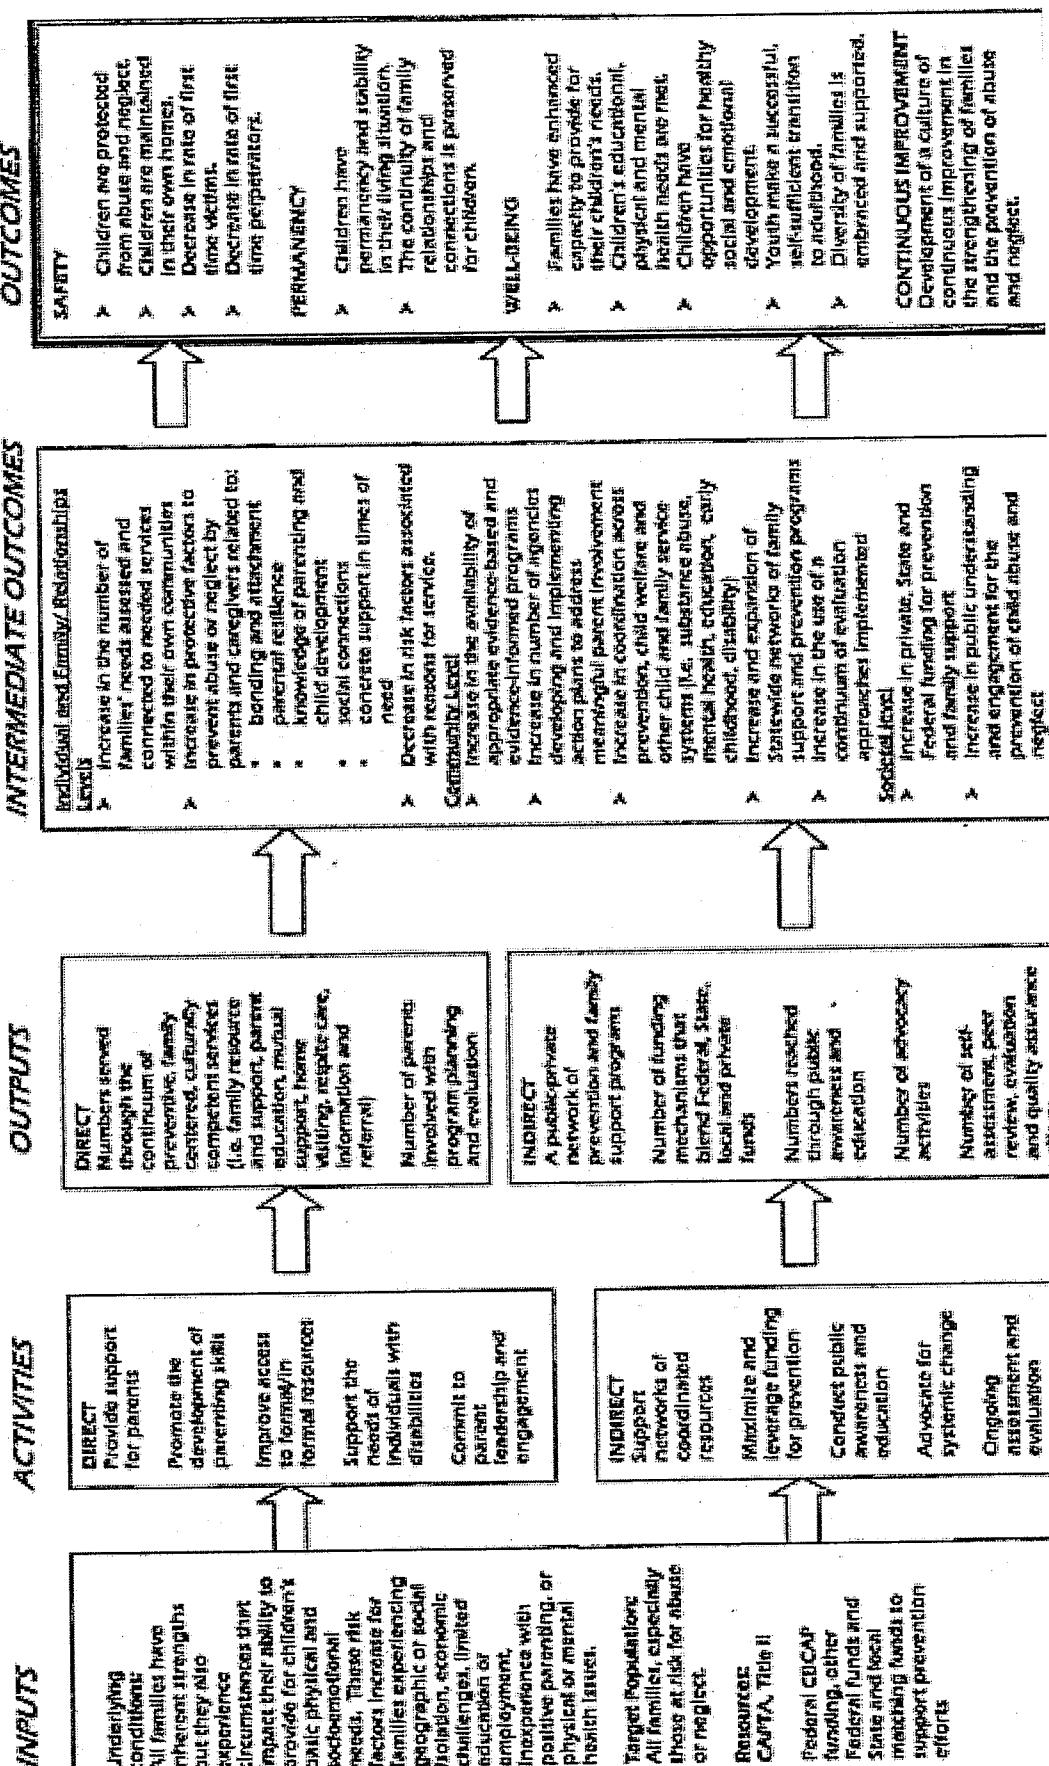

- A picture of the program.
- A map that links the program's desired outcomes to program's interventions and evaluation strategies.

# Sample Logic Model

## ATTACHMENT I: CBCAP CONCEPTUAL FRAMEWORK (revised 10-19-06)

The purposes of the CBCAP program are: (1) to support community-based efforts to develop, operate, expand, and enhance, and where appropriate to network, initiatives aimed at the prevention of child abuse and neglect; (2) to support networks of coordinated resources and activities to better strengthen and support families to reduce the likelihood of child abuse and neglect; and (3) to foster understanding, implementation, and knowledge of diverse populations in order to effectively prevent and treat child abuse and neglect.

# What are the steps in creating a logic model?

- Decide on population.
- Decide on outcomes.

# Review the Evidence

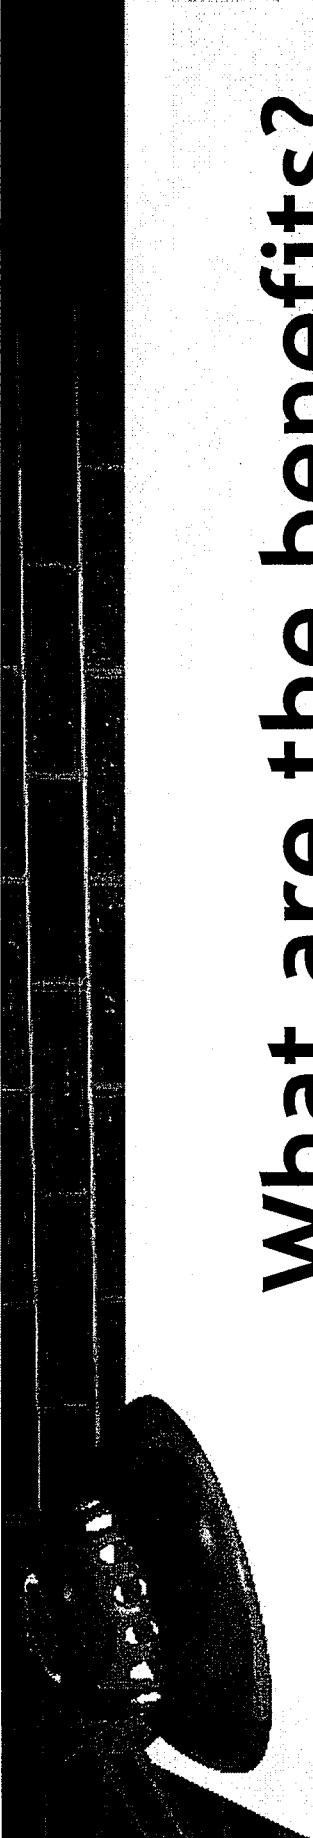

- <http://www.cdc4cw.org/Search/TopicArea>
- <http://www.childwelfare.gov/Search/ServicePractices/SearchResults>
- [http://www.ed.gov/ViolencePrevention/policy/Parent-Training Brief-a.pdf](http://www.parent-training Brief-a.pdf)

# What are the steps in creating a logic model?

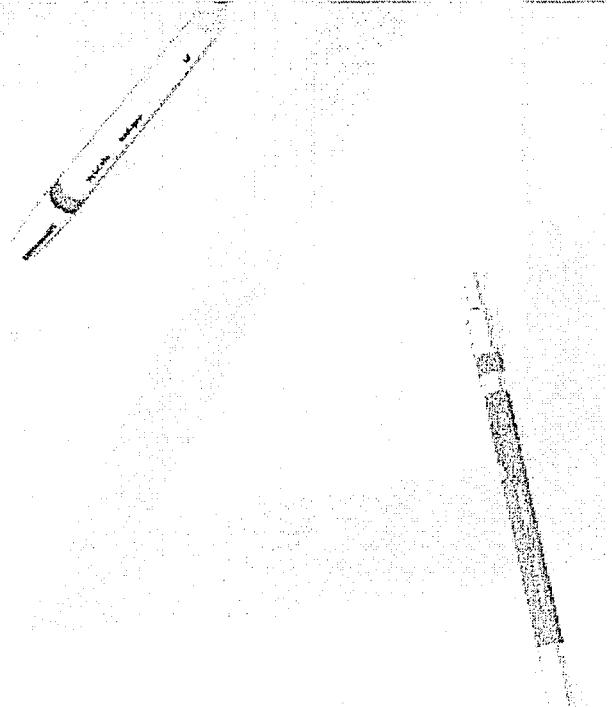

- Decide on population
- Decide on outcomes.
- Review the evidence.
- Decide on interventions.
- Decide on tools that will measure outcomes.

# How do I make a logic model?

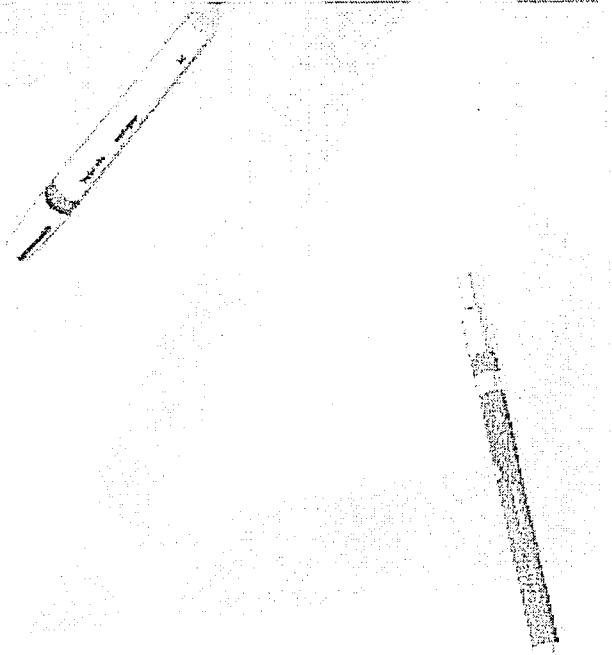

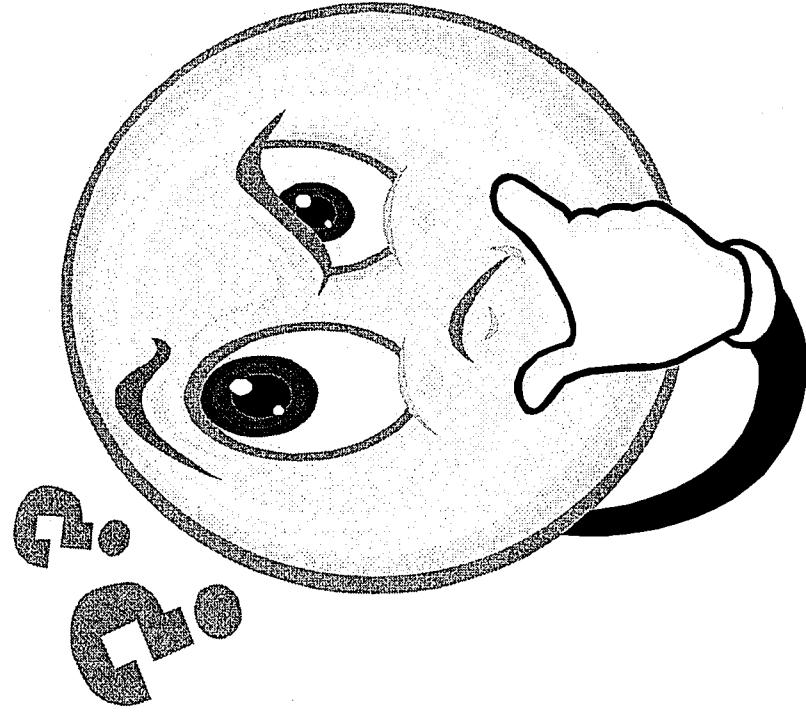

- <http://www.childwelfare.gov/preventing/developing/toolkit/>

# What are the benefits?

- Opportunity to chart the course.
  - Reasonable Plan.
  - Vision.
  - Evaluation.
-
